3D magnetic field configuration of small-scale ...

In this paper, we review the recent observations of small-scale reconnection events, with particular emphasis on the 3D magnetic field structure involved in these events Small-scale reconnection events, mainly based on the Hinode observations, are briefly reviewed in Section II

Statistical evolution of quiet-Sun small scale magnetic ...

The evolution of small magnetic features in quiet regions of the Sun provides a unique window to probing solar magneto-convection Here we analyze small scale magnetic features in the quiet Sun, using the high resolution, seeing-free observations from the Sunrise balloon borne solar observatory Our aim is to understand the contribution of

$d(\theta, \varphi)$ is the surface scattering from large scale dunes and $\sigma_r(\theta, \varphi)$ is the surface scattering from small scale ripples. Observations suggest that $\sigma_r(\theta, \varphi)$ is dominated by Bragg scattering that occurs at discrete θ and φ . The look directions at which Bragg scattering ...
